## Projects

### Product Mix Converter

[github.com/](https://github.com/ngallion/pmix-converter)

[ngallion/pmix-converter](https://github.com/ngallion/pmix-converter)

### Tools Used

Python, Flask, MySQL,

Bootstrap

Developed to aid restaurant management. Calculates product used based on items sold using an uploaded product mix report and user generated recipes. Use of application resulted in 6% reduction in cost of goods.

### Scheduling Helper

[github.com/](https://github.com/ngallion/ww-scheduling-helper)

[ngallion/ww-scheduling-helper](https://github.com/ngallion/ww-scheduling-helper)

### Tools Used

Java, Spring Boot, Hibernate,

MySQL, Bootstrap

Developed to aid in scheduling of employees. Allows employees to send in time off requests, which can then be sorted through and viewed by a manager.
